

Sagar Virmani

Experienced Software Engineer with strong hands-on expertise in Linux, Python, QA (manual & automation), build & release management, and Java technologies.

Effective trainer delivering project-based, practical instruction.

Technical skills

Programming Languages: Python, Java, C/C++, Shell scripting

Testing & QA: Automation & API testing, Manual testing, OpenCV

DevOps & Tools: CI/CD, Hudson, IBM WebSphere, Git

Frameworks: Spring, Hibernate, Struts

Others: Linux administration, Data analysis, MS Dynamics, Agile & Scrum, Training & Mentoring

Education

B.Tech, Software Engineering — SRM University (May 2013 – June 2017)

Coursework: Software Architecture, Data Structures & Algorithms, Operating Systems, Database Systems, Computer Networks, Software Testing, Object-Oriented Design, Software Project Management, Agile

Training : Linux Administration - RHCSA, Network Management— IIT Kharagpur (Nettech)

Projects : Participated in the IET Hackathon and completed a computer vision project on face spoofing prevention using eye-blink detection.

Work experience

Founder — OpenEd Labs (May 2026 - Present)

Currently conducting cost effective online training programs e.g Gen AI for educators under openEd initiative and offline based on requirements with a team.

IT Trainer — Datasphere (Sep 2021 – Feb 2025)

Delivered hands-on courses in Python, Java, Data Structures, Software Engineering, and Data Analysis; designed project-based modules and mentored students. Visit : <https://datasphere.eduspace.work>

QA Engineer — Evertz Microsystems (Jan 2021 – May 2023)

Performed manual and automated testing, developed Python automation for test cases and API testing, used OpenCV for video analysis. Automated deployments and converted shell scripts to Python to improve testing and release workflows.

Representative, Operations — Concentrix (Sep 2019 – Dec 2020) | Full time

Provided technical support for HP devices; used MS Dynamics to manage and resolve cases.

Software Engineer — Capgemini (Aug 2017 – July 2018)

Worked in Release Management on build and deployment processes (Hudson, IBM WebSphere); created scripts to streamline deployments and collaborated with dev/QA teams.
