

Orientation & Next Steps | openEd Labs Generative AI Training

Dear Candidate,

Thank you for expressing your interest in the **openEd Labs Generative AI Training Program**.

At **openEd Labs**, our mission is to equip students and professionals with practical, industry-relevant Generative AI skills that can be applied confidently in academic, professional, and business environments. Our training is designed to bridge the gap between theoretical knowledge and real-world implementation through hands-on learning and project-based experience.

Why choose this program?

Orientation before Enrolment

To help you make an informed decision, we will conduct a complimentary orientation session before the program begins. During this session, we will introduce the curriculum, explain the learning methodology, demonstrate the tools and technologies covered, and answer any questions you may have. **No payment is required to attend the orientation.** Enrolment will be open after the orientation session.

Project-Based Learning

Throughout the program, you will work on practical use cases and guided exercises that reflect real-world applications of Generative AI.

Portfolio Development

By the end of the training, every participant will complete **3–5 practical, portfolio-ready projects** that can be showcased on platforms such as GitHub, LinkedIn, or personal portfolios, strengthening both resumes and job applications.

Mentorship and Learning Community

Participants will receive continuous guidance from experienced trainers and become part of the openEd Labs learning community, providing ongoing access to resources, discussions, and future learning opportunities.

Future Opportunities

Exceptional participants may be considered for internship, freelance, training assistant, or project collaboration opportunities with openEd Labs and our partner organizations, subject to individual performance and the availability of suitable opportunities.

Communication & Collaboration

To ensure seamless communication throughout the program, all candidates are requested to join the official [openEd Labs Slack Workspace](#). Our trainers and program coordinators will use Slack to:

- Share orientation and training session links.
- Post announcements and important updates.
- Create batch-specific discussion channels.
- Resolve queries and provide learning support.
- Facilitate interaction and collaboration among participants.

Next Steps

Over the coming days, we will share:

- Orientation session date and joining details.
- Complete curriculum and learning roadmap.
- Batch schedule and duration.
- Enrolment process and program fee.

Note : If you have any questions regarding the program, enrolment process, or schedule, please feel free to reply to this message or contact our team directly through the **openEd Labs Slack Workspace**. We will be happy to assist you.

We look forward to welcoming you to the orientation session and supporting your journey toward developing practical, industry-ready Generative AI skills.

Regards,

openEd Labs
